

Contract Manufacturing Brochure

Build-to-print machining for pump OEMs, rotating equipment manufacturers, and heavy engineering customers worldwide.

Core Capability

Processes	CNC turning, VTL, milling, boring, drilling, threading, grinding, inspection
Component Diameter	Up to 1500 mm
Component Weight	Up to 5 Tonnes per piece
Length (Machining)	Up to 8000 mm
Length (Grinding)	Up to 6500 mm
Surface Finish	10 to 50 microns

Materials Processed

- Stainless steel (all grades including SS304, SS316, SS410, SS420)
- Duplex and Super Duplex steels
- EN-series alloy steels (EN8, EN19, EN24, EN353)
- Bronze, Gunmetal, and Cast Iron
- Nitronic 50 and other customer-specified grades

Components We Manufacture

- Precision pump shafts (standard and special)
- Shaft sleeves and bushes
- Impellers (machining and dynamic balancing)
- Couplings (muff, rigid, flexible hubs)
- Lock nuts, retainer rings, bearing assemblies
- Bearing housings, stuffing boxes, seal plates
- Wear rings, discharge manifolds, casing covers
- Custom gears (spur and helical)

Documentation

- Quality Assurance Plan (QAP)
- Material Test Certificate (EN 10204 3.1)
- Dimensional inspection report
- NDT report (DPT / UT / PMI)
- Dispatch packing record

Production Modes

We support prototype, batch, and repeat OEM production. We export to 12+ countries including USA, Germany, Japan, UAE, Saudi Arabia, and South Korea.

Certifications

ISO 9001:2015 certified. All operations under strict document control.
